

COSE461 Spring 2026

Assignment 1

Due: March 20 at 11:59 am (KST)

1. Install uv for dependency management

Windows (PowerShell):

➤ `powershell -ExecutionPolicy Bypass -c "irm https://astral.sh/uv/install.ps1 | iex"`

macOS / Linux (Terminal):

➤ `curl -Lsf https://astral.sh/uv/install.sh | sh`

2. Set up the project environment

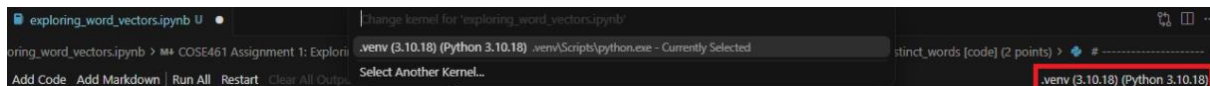

I. Unzip Assignment1.zip.

II. Navigate to the extracted folder.

III. Run the following command to install dependencies:

`uv sync`

3. In your notebook environment, select the kernel `.venv`.

4. Follow the instructions provided in `exploring_word_vectors.ipynb`.

How to submit Submit your completed `exploring_word_vectors.ipynb` file through LMS. The file name should be `StudentID_YourName.ipynb`. Make sure all cells are executed before submitting.
